

Protect the Supply Chain

CHALLENGES FACING GOVERNMENT AGENCIES

Government agencies have extremely complex supply chains where hidden risks, left undiscovered, can pose a fundamental threat to national security. But it can be difficult for even the most sophisticated agencies to obtain complete visibility into their vendor ecosystem beyond Tier 1 suppliers. Dun & Bradstreet helps military and civilian agencies turn data into actionable intelligence by helping to find and analyze hidden risks across the entire supply chain, while our data analysts provide the expertise to help support real time threat response.

Armed with Dun & Bradstreet's data and analytics, and our team of data scientists, you will have the actionable intelligence you need to proactively uncover, mitigate, and respond to supply chains risks, while saving on manpower, time, and resources.

DUN & BRADSTREET GOVERNMENT SOLUTIONS

Dun & Bradstreet supply chain solutions enable you to:

ASSESS AND PREDICT A CONTRACTOR'S COMBINED FINANCIAL, OPERATIONAL, AND SECURITY RISKS.

Continuously monitor potential risks that could critically impact your supply base, including financial and operational stability, sanctions violations, and political and geopolitical events.

UNCOVER STRUCTURAL VULNERABILITIES IN THE SUPPLY CHAIN.

Proactively spot instances where multiple suppliers may be relying on a single sub-tier supplier, so that you can more easily detect single points of failure that could affect upstream supplier networks. Your agency can respond accordingly by diversifying your supply chain portfolio, as needed, to reduce operational and financial risk.

GAIN COMPLETE VISIBILITY ACROSS THE ENTIRE SUPPLY CHAIN.

Uncover hidden relationships (hierarchies and linkages) between prime and subcontractors.

SAVE ON MANPOWER, TIME, AND COSTS.

Exhaustive, labor-intensive manual searches become obsolete. Our team of data scientists and analytics experts expedite the research process for you by reviewing, flagging, and categorizing suppliers based on a variety of criteria.

INCREASE SUPPLIER COMPLIANCE.

Help ensure businesses in your supply chain meet certain federal, state, and local regulations and reporting requirements.

DATA ANALYSIS AND STRATEGIES CUSTOMIZED TO YOUR NEEDS.

Don't see what you're looking for? Dun & Bradstreet's advanced analytics services are delivered through a flexible engagement model. We can partner with you to provide tailored data, analyses, business process reviews, and recommendations to help you achieve your unique mission objectives.

WHY DUN & BRADSTREET?

Dun & Bradstreet enables better government by uncovering truth and meaning in data.

Detailed hierarchy information ranging from **corporate legal hierarchies** to **analytically-derived linkages** based on brand and other associations.
